

OTA Test Cases (Improved Readable Format)

TC_ID	Category	Scenario	Expected Result	Status
TC_001	Download	Download test case 1: Validate OTA system behavior under condition 1.	System should correctly handle download scenario 1 without failure.	PASS
TC_002	Verification	Verification test case 2: Validate OTA system behavior under condition 2.	System should correctly handle verification scenario 2 without failure.	PASS
TC_003	Installation	Installation test case 3: Validate OTA system behavior under condition 3.	System should correctly handle installation scenario 3 without failure.	PASS
TC_004	Rollback	Rollback test case 4: Validate OTA system behavior under condition 4.	System should correctly handle rollback scenario 4 without failure.	PASS
TC_005	Security	Security test case 5: Validate OTA system behavior under condition 5.	System should correctly handle security scenario 5 without failure.	PASS
TC_006	Performance	Performance test case 6: Validate OTA system behavior under condition 6.	System should correctly handle performance scenario 6 without failure.	PASS
TC_007	Network	Network test case 7: Validate OTA system behavior under condition 7.	System should correctly handle network scenario 7 without failure.	PASS
TC_008	Edge Case	Edge Case test case 8: Validate OTA system behavior under condition 8.	System should correctly handle edge case scenario 8 without failure.	FAIL
TC_009	ECU	ECU test case 9: Validate OTA system behavior under condition 9.	System should correctly handle ecu scenario 9 without failure.	PASS
TC_010	Functional	Functional test case 10: Validate OTA system behavior under condition 10.	System should correctly handle functional scenario 10 without failure.	PASS
TC_011	Download	Download test case 11: Validate OTA system behavior under condition 11.	System should correctly handle download scenario 11 without failure.	PASS
TC_012	Verification	Verification test case 12: Validate OTA system behavior under condition 12.	System should correctly handle verification scenario 12 without failure.	PASS
TC_013	Installation	Installation test case 13: Validate OTA system behavior under condition 13.	System should correctly handle installation scenario 13 without failure.	PASS
TC_014	Rollback	Rollback test case 14: Validate OTA system behavior under condition 14.	System should correctly handle rollback scenario 14 without failure.	PASS
TC_015	Security	Security test case 15: Validate OTA system behavior under condition 15.	System should correctly handle security scenario 15 without failure.	PASS
TC_016	Performance	Performance test case 16: Validate OTA system behavior under condition 16.	System should correctly handle performance scenario 16 without failure.	FAIL
TC_017	Network	Network test case 17: Validate OTA system behavior under condition 17.	System should correctly handle network scenario 17 without failure.	PASS
TC_018	Edge Case	Edge Case test case 18: Validate OTA system behavior under condition 18.	System should correctly handle edge case scenario 18 without failure.	PASS
TC_019	ECU	ECU test case 19: Validate OTA system behavior under condition 19.	System should correctly handle ecu scenario 19 without failure.	PASS
TC_020	Functional	Functional test case 20: Validate OTA system behavior under condition 20.	System should correctly handle functional scenario 20 without failure.	PASS
TC_021	Download	Download test case 21: Validate OTA system behavior under condition 21.	System should correctly handle download scenario 21 without failure.	PASS
TC_022	Verification	Verification test case 22: Validate OTA system behavior under condition 22.	System should correctly handle verification scenario 22 without failure.	PASS
TC_023	Installation	Installation test case 23: Validate OTA system behavior under condition 23.	System should correctly handle installation scenario 23 without failure.	PASS
TC_024	Rollback	Rollback test case 24: Validate OTA system behavior under condition 24.	System should correctly handle rollback scenario 24 without failure.	FAIL
TC_025	Security	Security test case 25: Validate OTA system behavior under condition 25.	System should correctly handle security scenario 25 without failure.	PASS
TC_026	Performance	Performance test case 26: Validate OTA system behavior under condition 26.	System should correctly handle performance scenario 26 without failure.	PASS
TC_027	Network	Network test case 27: Validate OTA system behavior under condition 27.	System should correctly handle network scenario 27 without failure.	PASS
TC_028	Edge Case	Edge Case test case 28: Validate OTA system behavior under condition 28.	System should correctly handle edge case scenario 28 without failure.	PASS
TC_029	ECU	ECU test case 29: Validate OTA system behavior under condition 29.	System should correctly handle ecu scenario 29 without failure.	PASS
TC_030	Functional	Functional test case 30: Validate OTA system behavior under condition 30.	System should correctly handle functional scenario 30 without failure.	PASS

TC_ID	Category	Scenario	Expected Result	Status
TC_031	Download	Download test case 31: Validate OTA system behavior under condition 31.	System should correctly handle download scenario 31 without failure.	PASS
TC_032	Verification	Verification test case 32: Validate OTA system behavior under condition 32.	System should correctly handle verification scenario 32 without failure.	FAIL
TC_033	Installation	Installation test case 33: Validate OTA system behavior under condition 33.	System should correctly handle installation scenario 33 without failure.	PASS
TC_034	Rollback	Rollback test case 34: Validate OTA system behavior under condition 34.	System should correctly handle rollback scenario 34 without failure.	PASS
TC_035	Security	Security test case 35: Validate OTA system behavior under condition 35.	System should correctly handle security scenario 35 without failure.	PASS
TC_036	Performance	Performance test case 36: Validate OTA system behavior under condition 36.	System should correctly handle performance scenario 36 without failure.	PASS
TC_037	Network	Network test case 37: Validate OTA system behavior under condition 37.	System should correctly handle network scenario 37 without failure.	PASS
TC_038	Edge Case	Edge Case test case 38: Validate OTA system behavior under condition 38.	System should correctly handle edge case scenario 38 without failure.	PASS
TC_039	ECU	ECU test case 39: Validate OTA system behavior under condition 39.	System should correctly handle ecu scenario 39 without failure.	PASS
TC_040	Functional	Functional test case 40: Validate OTA system behavior under condition 40.	System should correctly handle functional scenario 40 without failure.	FAIL
TC_041	Download	Download test case 41: Validate OTA system behavior under condition 41.	System should correctly handle download scenario 41 without failure.	PASS
TC_042	Verification	Verification test case 42: Validate OTA system behavior under condition 42.	System should correctly handle verification scenario 42 without failure.	PASS
TC_043	Installation	Installation test case 43: Validate OTA system behavior under condition 43.	System should correctly handle installation scenario 43 without failure.	PASS
TC_044	Rollback	Rollback test case 44: Validate OTA system behavior under condition 44.	System should correctly handle rollback scenario 44 without failure.	PASS
TC_045	Security	Security test case 45: Validate OTA system behavior under condition 45.	System should correctly handle security scenario 45 without failure.	PASS
TC_046	Performance	Performance test case 46: Validate OTA system behavior under condition 46.	System should correctly handle performance scenario 46 without failure.	PASS
TC_047	Network	Network test case 47: Validate OTA system behavior under condition 47.	System should correctly handle network scenario 47 without failure.	PASS
TC_048	Edge Case	Edge Case test case 48: Validate OTA system behavior under condition 48.	System should correctly handle edge case scenario 48 without failure.	FAIL
TC_049	ECU	ECU test case 49: Validate OTA system behavior under condition 49.	System should correctly handle ecu scenario 49 without failure.	PASS
TC_050	Functional	Functional test case 50: Validate OTA system behavior under condition 50.	System should correctly handle functional scenario 50 without failure.	PASS
TC_051	Download	Download test case 51: Validate OTA system behavior under condition 51.	System should correctly handle download scenario 51 without failure.	PASS
TC_052	Verification	Verification test case 52: Validate OTA system behavior under condition 52.	System should correctly handle verification scenario 52 without failure.	PASS
TC_053	Installation	Installation test case 53: Validate OTA system behavior under condition 53.	System should correctly handle installation scenario 53 without failure.	PASS
TC_054	Rollback	Rollback test case 54: Validate OTA system behavior under condition 54.	System should correctly handle rollback scenario 54 without failure.	PASS
TC_055	Security	Security test case 55: Validate OTA system behavior under condition 55.	System should correctly handle security scenario 55 without failure.	PASS
TC_056	Performance	Performance test case 56: Validate OTA system behavior under condition 56.	System should correctly handle performance scenario 56 without failure.	FAIL
TC_057	Network	Network test case 57: Validate OTA system behavior under condition 57.	System should correctly handle network scenario 57 without failure.	PASS
TC_058	Edge Case	Edge Case test case 58: Validate OTA system behavior under condition 58.	System should correctly handle edge case scenario 58 without failure.	PASS
TC_059	ECU	ECU test case 59: Validate OTA system behavior under condition 59.	System should correctly handle ecu scenario 59 without failure.	PASS
TC_060	Functional	Functional test case 60: Validate OTA system behavior under condition 60.	System should correctly handle functional scenario 60 without failure.	PASS
TC_061	Download	Download test case 61: Validate OTA system behavior under condition 61.	System should correctly handle download scenario 61 without failure.	PASS
TC_062	Verification	Verification test case 62: Validate OTA system behavior under condition 62.	System should correctly handle verification scenario 62 without failure.	PASS

TC_ID	Category	Scenario	Expected Result	Status
TC_063	Installation	Installation test case 63: Validate OTA system behavior under condition 63.	System should correctly handle installation scenario 63 without failure.	PASS
TC_064	Rollback	Rollback test case 64: Validate OTA system behavior under condition 64.	System should correctly handle rollback scenario 64 without failure.	FAIL
TC_065	Security	Security test case 65: Validate OTA system behavior under condition 65.	System should correctly handle security scenario 65 without failure.	PASS
TC_066	Performance	Performance test case 66: Validate OTA system behavior under condition 66.	System should correctly handle performance scenario 66 without failure.	PASS
TC_067	Network	Network test case 67: Validate OTA system behavior under condition 67.	System should correctly handle network scenario 67 without failure.	PASS
TC_068	Edge Case	Edge Case test case 68: Validate OTA system behavior under condition 68.	System should correctly handle edge case scenario 68 without failure.	PASS
TC_069	ECU	ECU test case 69: Validate OTA system behavior under condition 69.	System should correctly handle ecu scenario 69 without failure.	PASS
TC_070	Functional	Functional test case 70: Validate OTA system behavior under condition 70.	System should correctly handle functional scenario 70 without failure.	PASS
TC_071	Download	Download test case 71: Validate OTA system behavior under condition 71.	System should correctly handle download scenario 71 without failure.	PASS
TC_072	Verification	Verification test case 72: Validate OTA system behavior under condition 72.	System should correctly handle verification scenario 72 without failure.	FAIL
TC_073	Installation	Installation test case 73: Validate OTA system behavior under condition 73.	System should correctly handle installation scenario 73 without failure.	PASS
TC_074	Rollback	Rollback test case 74: Validate OTA system behavior under condition 74.	System should correctly handle rollback scenario 74 without failure.	PASS
TC_075	Security	Security test case 75: Validate OTA system behavior under condition 75.	System should correctly handle security scenario 75 without failure.	PASS
TC_076	Performance	Performance test case 76: Validate OTA system behavior under condition 76.	System should correctly handle performance scenario 76 without failure.	PASS
TC_077	Network	Network test case 77: Validate OTA system behavior under condition 77.	System should correctly handle network scenario 77 without failure.	PASS
TC_078	Edge Case	Edge Case test case 78: Validate OTA system behavior under condition 78.	System should correctly handle edge case scenario 78 without failure.	PASS
TC_079	ECU	ECU test case 79: Validate OTA system behavior under condition 79.	System should correctly handle ecu scenario 79 without failure.	PASS
TC_080	Functional	Functional test case 80: Validate OTA system behavior under condition 80.	System should correctly handle functional scenario 80 without failure.	FAIL
TC_081	Download	Download test case 81: Validate OTA system behavior under condition 81.	System should correctly handle download scenario 81 without failure.	PASS
TC_082	Verification	Verification test case 82: Validate OTA system behavior under condition 82.	System should correctly handle verification scenario 82 without failure.	PASS
TC_083	Installation	Installation test case 83: Validate OTA system behavior under condition 83.	System should correctly handle installation scenario 83 without failure.	PASS
TC_084	Rollback	Rollback test case 84: Validate OTA system behavior under condition 84.	System should correctly handle rollback scenario 84 without failure.	PASS
TC_085	Security	Security test case 85: Validate OTA system behavior under condition 85.	System should correctly handle security scenario 85 without failure.	PASS
TC_086	Performance	Performance test case 86: Validate OTA system behavior under condition 86.	System should correctly handle performance scenario 86 without failure.	PASS
TC_087	Network	Network test case 87: Validate OTA system behavior under condition 87.	System should correctly handle network scenario 87 without failure.	PASS
TC_088	Edge Case	Edge Case test case 88: Validate OTA system behavior under condition 88.	System should correctly handle edge case scenario 88 without failure.	FAIL
TC_089	ECU	ECU test case 89: Validate OTA system behavior under condition 89.	System should correctly handle ecu scenario 89 without failure.	PASS
TC_090	Functional	Functional test case 90: Validate OTA system behavior under condition 90.	System should correctly handle functional scenario 90 without failure.	PASS
TC_091	Download	Download test case 91: Validate OTA system behavior under condition 91.	System should correctly handle download scenario 91 without failure.	PASS
TC_092	Verification	Verification test case 92: Validate OTA system behavior under condition 92.	System should correctly handle verification scenario 92 without failure.	PASS
TC_093	Installation	Installation test case 93: Validate OTA system behavior under condition 93.	System should correctly handle installation scenario 93 without failure.	PASS
TC_094	Rollback	Rollback test case 94: Validate OTA system behavior under condition 94.	System should correctly handle rollback scenario 94 without failure.	PASS

TC_ID	Category	Scenario	Expected Result	Status
TC_095	Security	Security test case 95: Validate OTA system behavior under condition 95.	System should correctly handle security scenario 95 without failure.	PASS
TC_096	Performance	Performance test case 96: Validate OTA system behavior under condition 96.	System should correctly handle performance scenario 96 without failure.	FAIL
TC_097	Network	Network test case 97: Validate OTA system behavior under condition 97.	System should correctly handle network scenario 97 without failure.	PASS
TC_098	Edge Case	Edge Case test case 98: Validate OTA system behavior under condition 98.	System should correctly handle edge case scenario 98 without failure.	PASS
TC_099	ECU	ECU test case 99: Validate OTA system behavior under condition 99.	System should correctly handle ecu scenario 99 without failure.	PASS
TC_100	Functional	Functional test case 100: Validate OTA system behavior under condition 100.	System should correctly handle functional scenario 100 without failure.	PASS
